Strada Electric Skirting Heating for Comfort and Style

- Skirting dimensions 140 mm high x 25 mm wall stand off.
- Supplied complete with integral silicon skirting to floor and skirting to wall seals.
- Powder coated white finish as standard (other colours available as an option).
- Hidden fixings mean no visible fasteners once installed.
- Full range of matching Aluminium corners, end covers and thresholds available.
- Adjustable height to ensure a good fit against your floor covering.
- Integral cable cavity to allow speaker and telephone cables to be hidden from view,
- Can be wired as individual lengths or linked together to suit a single power connection.
- Integral high temperature cut out to prevent over heating.
- Compatible with the latest wireless programmable thermostats.
- Supplied cut to exact length and pre wired and tested ready for immediate installation.
- None heated sections available to allow matching skirting throughout the area.

- Can be installed “inset” to provide a flush finish with the wall.
- A range of high quality profiles available to allow you to configure the skirting profile to suit your room.

Controls:

We recommend that Strada Electric Skirting be controlled by either hard wired or wireless programmable thermostat.

We can supply the most appropriate controls for your application.

To simplify installation lengths can be site linked together (up to a maximum of 3,000 watts output) and connected to one electrical supply.

All electrical connections must be undertaken in full compliance with current safety regulations.
